

EDUCATION	Faculty of Arts and Social Sciences, National University of Singapore Singapore <i>M.Sc. in Quantitative Economics</i> 2024 - 2026 (<i>expected</i>) • Core classes: Microeconomic Theory, Macroeconomic Theory, Econometric Modeling and Applications, R Programming for Economists. • Research interests: Quantitative Marketing, Household Finance, Real Estate Finance
	Guanghua School of Management, Peking University Beijing, China <i>B.Sc. in Economics</i> 2020 - 2024 • Academic performance: Behavioral Economics (GPA 3.98/4), Labor Economics (GPA 3.93/4), Management Science (GPA 3.88/4) • Major classes: Microeconomics, Macroeconomics, Econometrics, Marketing • Math classes: Advanced Mathematics, Linear Algebra, Probability and Statistics, Causal Inference, Financial Mathematics, Time Series Analysis, Asymptotic Statistics • Coding classes: Introduction to Computing, Simulation Model and Smart Decision
WORKING PAPER	1. Yi Zhou, Jia-nan Zhang . Personality Traits and Real Estate Market Preferences: Evidence from Machine Learning Applications. 2024.
RESEARCH ASSISTANT EXPERIENCES	Prof. Yuting Zhu's Research Group NUS, Singapore 2025.1 - Now • Led a real estate research experiment in Singapore, in collaboration with Prof. Zhu and co-author. Developed a Python script to scrape data from a major real estate website, collected and analyzed chat data from the experiment, and helped design the study's methodology. Documented the experiment pipeline and received positive feedback for my contributions to the project. • Analyzed real estate data, focusing on cleaning the data by removing outliers and using statistical tests and regression analysis to study how agent responses varied by race and nationality on a real estate platform. Applied text analysis techniques to understand how agents recommend properties, using Python and Stata for all analyses. • Serving as coordinator of current research assistant. Prof. Yuyu Chen's Research Group PKU, Beijing, China 2022.11 - 2022.12 • Conduct a systematic literature review analyzing how market competition influences the provision of information security for end users. Prof. Ling Zhong's Research Group CKUSB, Beijing, China 2022.07 - 2022.08 • Drafting literature review on using SEIR model to quantify the relationship between COVID-19 virus mutation and vaccine development. • Undertake teaching assistantship of the <i>applied metrics</i> summer school. Prof. Li-an Zhou's Research Group PKU, Beijing, China 2021.12 - 2022.1 • Extracting macro data and political information from government work reports using <i>text-mining</i> to examine whether a leadership transition or planning year will affect the authenticity of economic forecasts in official documents of China. • Checking the accuracy of the text analysis program using statistical software. • Cleaning and maintaining variables in extracted dataset using statistical software.

INTERNSHIPS	AIsphere Beijing, China 2023.9 - 2023.12 • Participated in company's text-to-video project, using prompt engineering on cloud computing platform for AI video creation, and tuning the company's video model • Conducting empirical NLP tasks such as text abbreviation, text expansion and shot generation, and developing theoretical NLP model using <i>deterministic finite automation</i>, supporting the online short drama app.
HONORS	• Third Prize, Scholarships for freshmen of Peking University 2020.09
SKILLS	Languages: Mandarin, English. Programming: Python, R, MATLAB, Stata, L ^A T _E X.
